

UCC University College

Complete Wayfinding Strategy

www.triagonal.dk

For the newly constructed UCC Campus Carlsberg, Triagonal in cooperation with DanSign designed the complete wayfinding strategy. Two towers in 8 levels with only two bridge connections made for a complex user flow, which was explained through a simplified metro-inspired overview. The signage was designed to blend seamlessly into the beautiful architecture and to function in a learning environment.

Client UCC University College
Location Copenhagen, Denmark
Project Period 2016
