

DTU Ballerup Campus

Wayfinding Systematics

www.triagonal.dk

DTU Campus Ballerup is a complex building which has been extended several times. This had resulted in a technical room number system not appropriate for wayfinding. Triagonal established a new wayfinding systematics which clarifies the campus structure, but at the same time a system that is recognizable and coherent with other DTU locations so that students, teachers and other users quickly and easily find their way around the campus area.

Client Danish Technical University
Location Ballerup, Denmark
Project Period 2013 - 2014
Team Peter Donner
 Tina Ravbjerg
 René Beier
