

Heathrow Airport

Terminal 2 - Terminal 3 Link

www.triagonal.dk

To ensure A380 capacity from day one of the opening of Terminal 2 Triagonal and Arup jointly developed a concept for a new bridge link between Terminal 2 and Terminal 3's Pier 6, which has space for the A380 . As this link is quite a walk focus was on a varied and spacious passenger experience and simple yet efficient wayfinding.

Client	Heathrow Airport
Location	London , England
Project Period	2012
